

# Alarm ◀

more infos...

*Powered by **Akumendo** framework, our stand-alone **Alarm** system can integrate **any** control system to provide easy and seamless yet much **more** efficient ways to receive alarms for fast intervention to your **monitoring system or your Guests and Owner...***

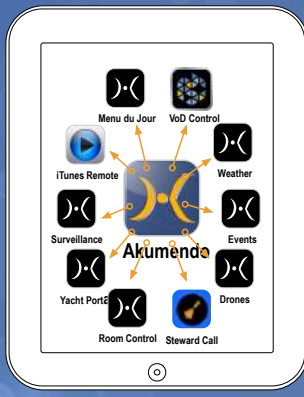

*Our system is part of a wider **function** based set of stand-alone options to leverage **Crew and Staff** workflow...*

- **Alarms Calls** can be sent from many user friendly options :
  - ▶ our stand-alone steward call app installed in any iPad, iPhone or Apple Watch
  - ▶ a custom signal from your monitoring system
  - ▶ a custom alarm integrated within your control system (e.g. Crestron)
  - ▶ a physical button from third party vendors (e.g. Panic, Ming)
  - ▶ a NMEA signal alert from your bridge Nav system
  - ▶ or, ideally, from within our Akumendo framework User Interface...
- **Crew members are notified anywhere and can acknowledge calls** :
  - ▶ Following their profil declared in the settings (several possible status)
  - ▶ from any personal carry-on iPad, iPhone or Apple Watch
  - ▶ from wall mounted iPad or iPod Touch (e.g. in Pantries)
  - ▶ from handheld UHF through optional gateway (e.g. Motorola)
  - ▶ from Bridge iPad or iPod touch forced and locked on all profil mode
- **Sound notifications are nice custom jingles** telling call origin...
- **All Alarm Calls activity is logged and can be exported to spreadsheets, database, intranet webpage, and emails...**
- **Easy integration with other Akumendo sub-systems like Patrol, Crew Desk...**

### Crew Desk App

For crew on board, watch list, CCTV, work infos, Steward calls
